

Coalition of Local Chambers

The Voice for over 13,000 Kansas Businesses

The coalition of local chambers of commerce listed below, representing more than 13,000 Kansas businesses, small and large, are aware of the difficult choices state government has been faced with in recent years with a challenging economy and dwindling revenues.

Our Kansas local chambers, governed by local businesses, believe it is critical to emphasize how statewide decisions impact efforts to attract and retain jobs in cities across our state. State Government is responsible to educate our children, provide certain levels of infrastructure for travel of our citizens as well as the movement of goods and services, and additionally to care for a percent of our population which do not have the ability to care for themselves.

We have joined together to present these position statements to advocate for policies which we believe create a strong economy, a qualified and nimble workforce, a sustainable infrastructure and ultimately a quality of life which retains our best and brightest and attracts businesses and talent to Kansas. Our members stand ready to work with you to bring our collective vision to reality.

K-12 SCHOOL FUNDING

The Coalition recognizes the fundamental importance of K-12 public education. Thus, the Coalition calls for a fair, adequate and equitable K-12 funding formula that allows for a substantially equivalent opportunity for all students to achieve statewide defined educational outcomes. The formula should include strong and flexible local authority regarding the raising and spending of education funds.
